

Brainstorming & Idea Prioritization

Team Members: Thrivedh Reddy (Lead), Bhagesh T., Harshavardhan R., Vijay R., Sampath K.

1. Project Ideas Brainstormed

Resume Customizer: An AI tool matching resumes to job descriptions.

AI Mock Interviewer: Prep tool with speech-to-text feedback.

Personalized Networking Assistant: A system generating tailored starters for events using zero-shot classification and text generation.

2. Prioritization & Value Matrix

We selected the Personalized Networking Assistant because it targets a highly relatable problem (networking anxiety), relies on lightweight local models (DistilBERT/GPT-2) that run easily on CPU without API keys, and has clear modular boundaries for team allocation.
