

Scalability & Future Plan

Date	15 March 2024
Team ID	Group 5 (AP24110011158)
Project Name	Personalized Networking Assistant
Maximum Marks	1 Mark

Scalability & Future Plan:

This document outlines how the current project solution can be scaled to handle larger user bases, increased data loads, or extended features in the future. It also captures the team's roadmap for enhancing and evolving the project beyond its current state.

Current System Limitations:

S.No	Limitation	Impact	Priority to Address (High / Medium / Low)
1	Local GPT-2 model has lower prompt coherence JSON file logs do not support concurrency	Local single user	Medium High
2	JSON logs files	Deploy Docker image to AWS ECS cluster	
3	CPU in-memory load	Migrate database to PostgreSQL server Attach CUDA GPU instances for fast speed	

Scalability Plan:

S.No	Scalability Aspect	Current State	Proposed Upgrade / Solution
1	User Load		
2	Data Storage	Integrate Google Gemini API	Month 2 (Enhances conversation context)
3	Performance	Support Google/Email login auth	Month 3 (Enables user accounts profile)
4	Security		

Future Roadmap:

Phase	Planned Feature / Enhancement	Target Timeline	Expected Impact
-------	-------------------------------	-----------------	-----------------

Phase 2			
Phase 3			
Phase 4
