Customer Journey Map

Map out the customer's experience stage-by-stage, capturing their actions, touchpoints, thoughts, and feelings, along with process ownership and improvement opportunities at each stage.

Phase of Journey	Stage 1 Preparing for the Networking Event	Stage 2 Using the Personalized Networking Assistant	Stage 3 Networking at the Event
Actions <i>What does the customer do?</i>	- Searches for information about the networking event. - Identifies personal interests and networking goals. - Thinks about potential discussion topics.	- Enters the event description and interests into the application. - Reviews extracted topics and generated conversation starters. - Verifies facts using the Wikipedia feature.	- Uses the generated conversation starters during conversations. - Builds meaningful professional connections. - Reviews conversation history and feedback after the event.
Touchpoint <i>What part of the service do they interact with?</i>	- Event announcements or conference details. - Personal profile and interests. - Event agenda or website.	- Streamlit web application. - FastAPI backend services. - AI models (DistilBERT and GPT-2). - Wikipedia API.	- Networking event participants. - Generated conversation starter history. - Feedback/history section.
Customer Thought <i>What is the customer thinking?</i>	- I hope I make valuable professional connections. - What topics should I discuss? - How can I prepare effectively?	- These conversation starters are relevant. - I feel more prepared for networking. - Let me verify this information before discussing it.	- The suggestions helped me start conversations. - I feel more confident speaking with others. - I should save useful conversation starters for future events.

Customer Feeling <i>What is the customer feeling?</i>	• Curious • Nervous • Slightly anxious	• Confident • Prepared • Motivated	• Comfortable • Satisfied • Accomplished
Process Ownership <i>Who is in the lead on this?</i>	• User • Event organizer	• Personalized Networking Assistant • AI models (DistilBERT & GPT-2) • Wikipedia API	• User • Networking event participants
Opportunities <i>How can we improve this stage?</i>	• Recommend trending event topics. • Allow users to save multiple networking profiles. • Provide event-specific preparation tips.	• Improve personalization using user feedback. • Support multiple AI models (e.g., Gemini in future versions). • Generate more diverse conversation starters.	• Suggest follow-up conversation ideas. • Provide networking performance analytics. • Recommend future networking events based on user interests.
